Características y ventajas: Cáncamo giratorio necesario para levantar cargas, se ensambla a la carga en sí, con un orificio roscado específico que se usa para girar o inclinar cargas pesadas. Coeficiente 4 en todas las direcciones de carga. Diseñado, probado y certificado de acuerdo con la directiva técnica GS-OA 15-04 - EN 1677 y la directiva de máquinas 2006/42/EC. Probado al 100% magnaflux. Probado a 20.000 ciclos de estrés. Se puede orientar a 360º con anillo basculante autoalineable a 180º. Montado con esferas para facilitar la orientación de la carga. En el tiro axial puede haber variación de +/-5º con una disminución de capacidad del 10%
